## PROFESSIONAL SUMMARY

Applied Computing (FinTech) undergraduate at SIT (GPA 4.31/5.0) with a strong quantitative foundation and hands-on experience building data-intensive financial applications, placed 4th of 170+ teams at the FinTech Innovator's Hackathon 2026 with a real-time macro-economic intelligence platform. I am seeking to apply my rigorous software engineering skills and markets knowledge.

## EDUCATION

**Singapore Institute of Technology (SIT)** Sep 2025 – Apr 2028  
BSc (Honours) in Applied Computing (FinTech) — GPA: 4.31/5.0, Second Class (Upper) Honours

**St Andrew's Junior College, GCE A Levels (AAB/A)** Jan 2019 – Dec 2020  
SAJC Commendation Award for Science Stream (2019 and 2020)

## TECHNICAL SKILLS

**Languages:** Python (Pandas, NumPy, Scikit-learn), Java, SQL (MySQL, PostgreSQL), R, JavaScript  
**Frameworks & Tools:** FastAPI, Git/GitHub, Docker, Streamlit, Excel  
**Domains:** Quantitative analysis, statistical anomaly detection, real-time market data pipelines, REST APIs

## FINTECH PROJECTS

**Macro-Economic News Intelligence Tracker** (*FinTech Innovator's Hackathon Finalist*) Mar 2026

- Placed 4th of 170+ teams (top 3%), competing against teams from Singapore's top universities.
- Architected a real-time macro-economic dashboard for institutional asset managers, cutting research noise by ~80% through a multi-stage filtering pipeline.
- Engineered a concurrent ingestion pipeline across 7 institutional sources (Reuters, Federal Reserve, SEC) using FastAPI, with strict source whitelisting and end-to-end processing under 15 seconds; flagged market-moving themes at  $Z > 2.0$  significance via Bollinger Band anomaly detection on rolling article volumes.
- Integrated LLM-based risk profiling (Llama 3.1 via Groq) with enforced source citation, maintaining 100% citation accuracy for zero-hallucination output.

**S.I.N.G. Plan (Personal Financial Planning Platform)** Jun 2026 – Present

- Building a free financial planner for Singaporeans that converts a user's profile and goals into a monthly savings plan, salary allocation breakdown, and milestone timeline with CPF contribution and allocation rules modelled end-to-end.

**Human Augmentation Neural Analytics (HANA)** (*with SIT Physiology faculty*) May 2026 – Present

- Partnering SIT's Head of Physiology to build a computer-vision application quantifying elderly fall risk from guided exercises. In addition, I integrated NVIDIA SynthDA for synthetic training data.

## WORK EXPERIENCE

**Private Tutor, SmileTutor Pte Ltd** Apr 2026 – Present

- Design customised H2 Chemistry, Mathematics, and Science lesson plans for secondary and JC students; coach exam strategy and distil complex concepts into clear visual aids.

**Data Entry Team Lead, Ultra Supplies** Jan 2023 – Jun 2023

- Led a data-entry team and reported project milestones to the project manager, delivering all project goals on schedule.

## LEADERSHIP & AWARDS

**IMDA SG Digital Young Leaders Programme** Jun 2026 – Present

- Selected among Singapore's top STEM undergraduates for the SG Digital Leadership Accelerator where I will be mentored by senior technology industry leaders.

**National Service, 1st Commando Battalion** Jan 2021 – Nov 2022

- Served in the unit awarded Best Combat Unit 2022; built discipline, resilience, and the ability to execute under sustained pressure in high-stakes team settings.

**SIT Dragon Boat** Mar 2026 – Present

- Competitive crew member balancing multi-session weekly training with a full academic load
- Took the initiative to build the team's Excel-based performance tracker.
